The Empire of the Incas flourished for only about 100 years, but it was one of the largest and richest ancient civilizations in the Americas. In the late 1430s, the Incas began to conquer neighbouring tribes and put them under their control. At the peak of the empire's power, its lands extended nearly 2.500 miles along the western coast of South America.

Life in the Inca Empire was organized by social rank. The emperor, called the Sapa Inca, ruled over everyone and was obeyed without question. He was believed to be a living god. Next in importance were the nobles. They were the government officials, building engineers, and military leaders. The Sapa Inca and the nobles had many privileges. They lived in stone palaces, had more than one wife, wore beautiful jewelry, and dressed in coloured, silky clothes. Most of the common people were farmers who cultivated the land and raised livestock.

Although travel was by foot, the Incas constructed roads and made rope bridges that crossed over rivers, linking the empire together. The Incas also excelled in the crafts of weaving, pottery, and metalworking. Many objects were made from gold, which they called "sweat of the sun".

In the 1530s, the Spanish came to the empire in search of this gold. They conquered the Incas, destroyed their temples, and took their gold and silver wealth. The great empire vanished forever.

Improving education is a huge issue. Test scores, our perceived performance against other countries, and other factors have pushed education to the forefront of national politics, right behind healthcare reform. Technology can be used to improve teaching and learning and help our students be successful. It can be a "force multiplier" for the teacher. Instead of the teacher being the only source of help in a classroom, students can access online tutorials, and more to assist them.

Education doesn't stop at the end of the school day because students have access to teachers and resources, at any time. Students can also get help and tutoring at any time, whether from the teachers via email or online collaboration. They can connect with students at other schools and do collaborative work with them.

Parental involvement is another factor that can increase students' achievement. Thanks to technology, parents can go to a class website and see what their child is working on, they can contact teachers via email and web sites, and they can even check their child's attendance and grades through online systems.

Teachers can use technology to find resources and attend virtual professional development seminars and conferences. They can also create personal learning networks and other resources to find and share ideas and resources, and get support from their colleagues.
